LEADERSHIP IN CRISIS

Over the past month, the world has been thrown into uncertainty due to the conflict in West Asia. Through many conflicts, India's leadership has always remained strong, firm, and resilient. Rahul Gandhi has consistently said that one man's interest cannot be bigger than the country's. Unfortunately, PM Modi has jeopardised India's energy security and put people at risk - all to protect himself and his friends.

CITIZENS SHOULD NOT PAY THE PRICE FOR CONFLICT

Rahul Gandhi warned that the conflict would have serious consequences for India. The central artery - the Strait of Hormuz - through which 20% of global oil flows has been blocked. He noted that it was ordinary people who bore the burden - small businesses, restaurants, street vendors, and families panicking to make ends meet. Long queues for LPG cylinders have formed across the country, yet the government has turned a blind eye to people's suffering.

DELHI BOWING DOWN TO WASHINGTON?

Rahul Gandhi emphasised that energy security is the foundation of every nation. He directly challenged the government: Why is India allowing the United States to dictate who we buy our energy from? He made it clear that Prime Minister Modi has bartered away India's energy sovereignty to the United States. For a nation of India's size and stature, it is absolutely unprecedented to seek permission from another country to buy oil from Russia.

THE PRICE INDIA PAYS FOR MODI'S DEALS

Rahul Gandhi acknowledged that he was initially puzzled by why the PM had decided to sell India's interests. Then he cracked the code: India's interests had been sacrificed as part of a compromise. He argued that the United States can dictate terms to India because Modi ji is willing to bend over backwards to protect Gautam Adani from US legal action. But the web of compromise runs deeper – Minister Hardeep Singh Puri's friendship with criminal Jeffrey Epstein has become another lever of pressure to undermine India's sovereignty and betray our national interests.

CREATING JOBS FOR INDIA

Speaking to professionals at Technopark in Thiruvananthapuram, Rahul Gandhi delivered a blunt reality check: jobs don't disappear, they relocate. The real question is: why is the government failing to capture them? He pointed out that IT alone cannot employ millions, yet the government has neglected building a strong industrial base. While other countries are aggressively creating manufacturing ecosystems, India is being left behind, watching opportunities slip away.
